EDUCATION

**University of Denver, Daniel Felix Ritchie School of Engineering
& Computer Science**

MS Computer Science

Thesis: Identification and Mitigation of Biases in Machine Learning Algorithms

Denver, CO

Expected Graduation 2022

Minnesota State University- Mankato

BSc. Computer Information Technology

Minors: Biology

GPA 3.44 Cum Laude

Mankato, MN

06/2016

TECHNICAL TOOLBOX

Programming Languages: Python, Java, R, C++, JavaScript, Django, PostgreSQL, SQL Server, ROS, TensorFlow, ScikitLearn

Applications: Atlassian (JIRA, Confluence), PowerBI, Git and Bitbucket, Gazebo, AWS, NetBeans, Slack

WORK EXPERIENCE

University of Denver, Denver, CO

Graduate Teaching Assistant: Computer Science Department

Denver, CO

09/2020 – Present

- Assist faculty in teaching various Computer Science subjects like Programming with JAVA, Python, C++, Assembly language and Introduction to Computer Security to 100+ undergraduate and graduate students
- Grade homework assignments and labs for all the classes, and host office hours to help students with assignments

Cloudmed Revenue Intelligence Solutions

Software Dev/Ops Engineer

Denver, CO (Remote)

01/2019 – 07/2020

- Administered Continuous Integration pipelines for code deployment using Git and Bitbucket
- Led and supervise all IT processes for two service lines with different engineering teams, products, and delivery
- Developed and delegated software solutions to address business needs and problems
- Managed and communicate across different software dev teams to get the operations running for two different platforms
- Streamlined, monitored, and improved infrastructures like AWS, tservers, PostgresDB and fireworks across different platforms

Acustream Inc (Later acquired by Cloudmed Revenue Intelligence Solutions)

Associate Software Developer

Lafayette, CO

09/2016 – 12/2019

- Executed data processing, rules processing and invoicing for 50+ hospital and physician organizations
- Collaborated with all the internal teams and clients to optimize revenue generation systems, resulting in client satisfaction and revenue growth
- Developed new algorithms and new KPIs to evaluate health of the architecture components the overall system
- Utilized JIRA & Confluence to track and update issues, and create standard operating procedures (SOP)
- Defined and enforced workflow process for all IT issues, errors and need

Knowledge Factor Inc.

Content Intern

Boulder, CO

05/2015 – 08/2015

Program Development

- Created Python application for Client Support Team (Tier-2) complete with User Interface which searches user credentials in the company database, provides application access to new and existing users and creates csv files on user information and UUIDs
- Saved 80% on company budget and Tier-2 time, spent on creating new sub-user accounts and/or troubleshooting user account related issues

Printing Services, Minnesota State University: Copy Shop Supervisor

Reporters, Minnesota State University: Writer and reporter

08/2012 – 05/2016

08/2012 – 01/2014

AWARDS & ACHIEVEMENTS

CSET Scholarship *Enventis Foundation Scholarship*

Dean's List *for Academic Excellence*

2011, 2012, 2014, 2015
